

Armonia Indigenous Mexican Scholars

Ernesto (Neto) is studying civil engineering at Mexico's National Polytechnic School. Right now he is doing his social service at a lab where they make metal structures. The first few weeks he was in charge of cleaning the equipment, put order, to clean the Warehouse, how to weld, which is something that his classmates wouldn't dare to do.

When he was done doing these activities, the chief of staff ask Natalie to participate AZ a teacher and that's part of a work team.

Armonia Indigenous Mexican Scholars

Ernesto said,
My first experience in the this line of work has been to make the structure of a building in three levels, so that it won't collapse or sink.

I am grateful with At no ia and with every single person that participates in it. You all have given me a holistic medication that has allowed me to overcome the fear to do things and is opening the doors for the future.

We would like to thank all of you sharing your love and resources!
