

## Armonia Indigenous Mexican Scholars

My name is Gamaliel Cruz (Gama), and I am studying the last quarter of the mechatronics degree. This gives me plenty of joy and satisfaction. I come from the Oaxaca mountains, and my village is called Comaltepec. My origin is Zapotec.

I have been collaborating with Armonia, doing things that are related to my degree. I have also traveled to Oaxaca to help with the installation of the electricity at Casa Margarita. I love what I do and I love my degree.

Armonia  
together, transforming  
poverty into life...

## Armonia Indigenous Mexican Scholars

I did my first internship with the Federal Electricity department in order to obtain my license as a mechatronics technician, in the automatization area.

Right Now, I am doing my professional practice at textile factory. Specifically, I am working with the maintenance department. This will enable me to obtain my Engineering in Mechatronics degree.

I am grateful with my Armonia family for their unconditional support, and with the friends who are constantly praying for us to make our dreams come true.

Thank you!
